Product Description

FIRELINE 8/40 RDX LS Ribbon is specially processed ribbon detonating cord using "shrinkage resistant" construction components. Its recommended application is "RTG" (retrievable tubing gun) perforating systems (1-11/16", 2-1/8", 2-3/4") and should be employed within the normal RDX operating range (see graph below). Ribbon cord utilizes minimum carrier I.D. space allowing for an application of a larger designed shape charge.

Temperature Range

The temperatures listed are maximum values. **DO NOT EXCEED.**
