

Blood Drive 2019

The employees of the Dyno Nobel Corporate Office participated in a blood drive with Extra Space Storage on April 4, 2019.

To put donating blood into perspective, in just 48 hours, two patients at an ARUP hospital used nearly 300 O+ blood products, which is usually a week-long supply of blood for all O+ patients. In addition, the hospitals that ARUP donates to average 50-60 patients each day using blood. Donating blood is truly a “gift of life” that a you can give to others in our community!

Thank you to Robin Scheuerman for organizing this event for a second year for the office and Extra Space Storage.
