

Dyno Nobel Huntsman 5K Team

2018 Huntsman 5K

The Huntsman 5K began with a Walk of Hope in 2013 with a vision to eradicate cancer. To date, the Huntsman 5K participants have raised over \$500,000 for cancer research. Thanks to research, many forms of cancer are now prevented entirely or diagnosed in their earliest, most treatable stages. Thanks to research, new treatments and interventions exist for advanced cancers. By funding efforts to better understand the beginnings of cancer and more effectively treat cancer, Huntsman Cancer Foundation (HCF) helps relieve suffering and improve the quality of life for cancer patients, survivors, and their families.

Saturday, June 16, 2018 Dyno Nobel participated in the Huntsman 5K, helping to raise funds for cancer research. Employees rallied to raise extra funds for the cause. Our goal of \$5K for the 5K and with multiple fundraising events the goal was exceeded. Duck Wars was the first event that took place to help raise additional funds for the cause

while having fun. Employees of Dyno Nobel purchased rubber ducks to race across the pond. The selling of the ducks raised over \$600. This event is just one of the ways Dyno Nobel lives its core value, Care for the Community and Environment.
