### 8.2 Exposure Controls

**Personal Protective Equipment:**

**General Protective And Hygienic Measures:** The usual precautionary measures are to be adhered to when handling chemicals. Keep away from foodstuffs, beverages and feed. Wash hands before breaks and at the end of work.

**Respiratory Protection:** Not required under normal conditions of use. Respiratory protection may be required after product use.

**Protection of Hands:** Wear gloves for the protection against mechanical hazards according to NIOSH or EN 388.

**Material of Gloves:** The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

**Penetration Time of Glove Material:** The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
